

SANTIAGO BETANCUR Z

Born in Medellin, Colombia 1967.

Master in Fine Arts, National University of Colombia.

Since 2000, Santiago observes for the first time the surprising range of colors that can be seen in soap bubbles.

At that moment he begins a journey in the world of science and establishes a new relationship with light and the universe. It was a moment of Epifanny. The doors of science museums, specialists in optics, astronomy were opened achieving the interest of several communities around the world.

Santiago has been in Science Museums with the soap bubbles experience. Museums as Miami Science Museum, the interactive museum "Centrum Nauki" in Poland and Explora Park in Colombia.
